This past year brought exciting clinical expansions and new programming through a variety of grants and partner funding. Our clients have access to a jail therapist, day treatment in an elementary school, an increase in crisis beds for adults—and more evidence-based services.

In partnership with Case Western Reserve University, we trained staff on Adventure Therapy. Known as a particularly innovative treatment for adolescents that utilizes a variety of unique situations, this therapy is contained in various activities making it well suited to the active teen.

Changes for statewide behavioral health redesign have been successfully implemented.

A full-time Development Director joined our team. Kristine Frankenberry has spearheaded our fundraising, marketing and community outreach efforts, spending much of her first months learning about Ravenwood Health and the Geauga community.

Our 2nd Run with Ravenwood 5K/1 Miler event was well received, with proceeds over $8,000 supporting compassionate mental health and addiction services.

Next year will reflect more new programing, continued community partnerships, and prevention and treatment services.

We thank our generous community for your continued advocacy for individuals diagnosed with mental health and addiction concerns.
